SUMMARY INTERIM REPORT 1Q 2020

The result for Norwegian Hull Club for the first three months of 2020 is minus USD 1.6 million. Technical result of insurance operations is USD 19.1 million while the result from investments and other financial items is minus USD 20.7 million.

Profitability on insurance operations is above expectations due to positive claims development. The combined ratio is 63 % so far in 2020. There is no clear, negative net impact from the Covid-19 pandemic.

Return on the investment portfolio is minus 3.8 % in USD. The USD return corresponds to minus USD 17.1 million. The balance of financial income stems from interest earned on bank accounts and receivables as well as foreign exchange items. Financial markets fell strongly and sharply as a result of the Covid-19 pandemic. Risk assets with high capital requirements fell the most. As a result of the positive result from underwriting, capital adequacy has improved since the end of 2019.

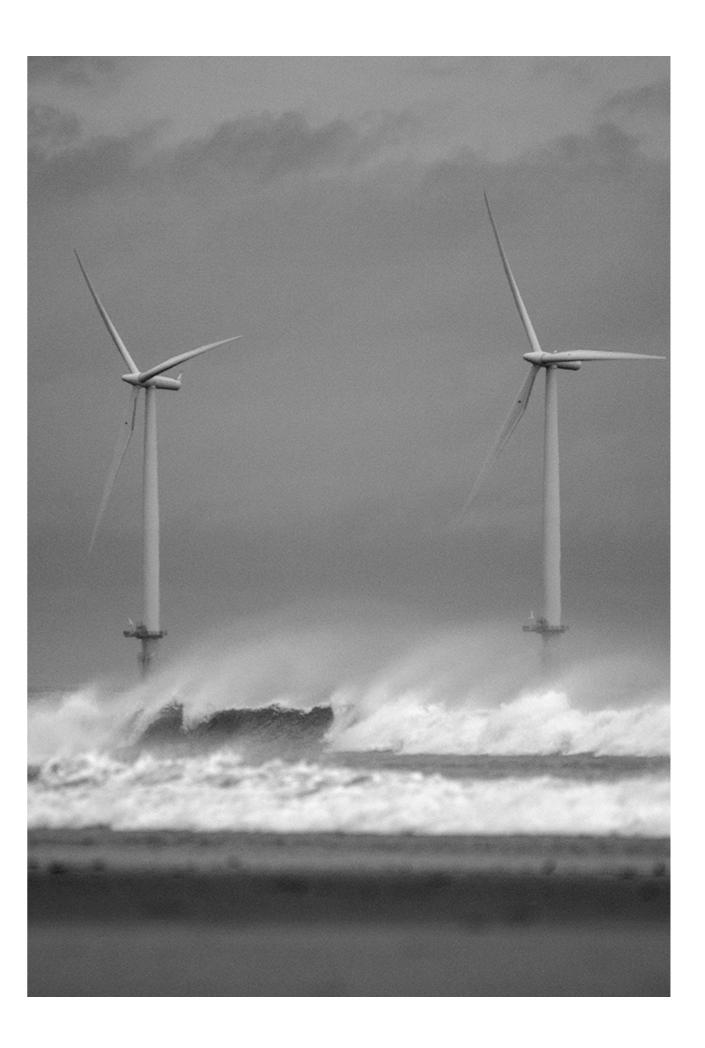

Equity is USD 299.7 million at the end of March 2020.

EXPLANATORY NOTES TO THE INTERIM FINANCIAL REPORT

Note 1 - Accounting policies

Norwegian Hull Club's interim financial report is presented in accordance with IAS 34 interim financial reporting and in compliance with the Norwegian Accounting Act, Finance Ministry's prescribed regulations from December 16, 1998 on Financial Statements for Insurance companies and regulations from January 21, 2008 on simplified IFRS.

The application of IAS 34 means that the report is limited relative to the presentation of a full annual report.

The main accounting policies are unchanged from the annual report 2019 and the annual report contains the full description of the accounting policies.

Note 4 - Off balance items

Guarantee liability regarding claims Gross guarantees issued Counter-guarantees from co-insurers Guarantees for own account

All guarantees relate to clients` liabilities in connection with collisions, groundings etc. associated with The Club's activities.

Note 5 - COVID-19

Since the second half of February 2020, global business has been significantly impacted by the COVID-19 virus and the measures taken by authorities to slow and limit its spread. Norwegian Hull Club is exposed to effects of the pandemic both in underwriting and investment operations. Underwriting exposure relates to business and trade disruption for units insured, as well as medical and liability insurance for crews.

Transportation and other economic activity have reduced following COVID-19. Consequent measures, such as the lay-up of vessels, reduce underwriting exposure. Year to date, claims expenses are far below expectations, and there has been no direct impact of the pandemic on the insurance portfolio so far. However a general slowdown in shipping has likely contributed to a temporary improvement of claims expenses for hull-related insurances. Financial markets have been negatively impacted by the COVID-19 pandemic. Norwegian Hull Club's investment portfolio was also impacted and was down 3.8 % in the first quarter.

Equities and other asset classes with a high capital requirement fell most. As interest rates fell, low-risk fixed income had positive returns. For Norwegian Hull Club, the net effect on capital adequacy in the first quarter is positive, i.e. the capital adequacy has improved from 31.12.2019.

The investment portfolio was defensively positioned going into 2020. Return in the first quarter was, therefore, better than applicable benchmark. Financial markets have, in general, been positive in the second quarter.

Note 6 - Material events subsequent to the end of the interim period

To the best of our knowledge, there have been no material events subsequent to the end of the interim period.
